THE BEST START FOR YOUR CALVES

BioStart Calf ensures the right microbes dominate the gut from day one.

BioStart Calf is powered by signal molecule technology. Calf contains a concentrated blend of enzymes and secondary metabolites from the fermentation of *Lactobacillus acidophilus*, *Bifidobacterium* and *Streptococcus thermophilus*. BioStart Calf aids in the full utilization of liquid feeds and early rumen development.

- Contains rennet to increase milk digestion
- Stimulates immune system
- Easy to use & palatable
- No withholding period

Directions for use:

New Born: New born calves should receive an initial oral dose of 2ml per head as soon as possible after their first feed.

Calves on Milk Replacer: Mix with whole milk or milk replacer at the rate of 1ml per head per feed for the first 3 weeks. Once BioStart Calf has been added to milk, feed within 20 mins

Brought in Calves: Administer an oral dose of 2ml/head before/after transport.

Pack sizes available: 2, 5 and 10 litre
